## **OLD DAY CEMETERY**

N					GR7
	<b>LEGEND:</b> HEADSTONE	FIELDSTONE	BROKEN, ILLEGIBLE HEADSTONE	STONE WALL	

NOTE: All stones in this cemetery were turned 180° at an unknown time prior to 2010. Though the inscribed side of the headstones now faces the street, they originally faced the opposite direction (toward the river). Thus the footstones (which remain correctly positioned, facing the road) are in *front* of the headstones rather than *behind* them. The orientation of this map is therefore off by 180° from the original cemetery layout, staying with the pattern of orienting maps from the perspective of a person standing in the location required to read the headstone inscriptions. Evidence indicates an original entrance at approximately Row 3, Lot 1. No documentation has been found that shows the original layout of the cemetery or burials. No documentation has been found indicating ownership of specific lots within the cemetery. Row and Lot numbers on this map were assigned when this map was drawn, as a way to indicate whose headstone is located where on the site.
